

Service Delivery Navigation NSEW *Chronic Disease Management* Workshop

Date: Saturday 9 May 2009
Time: 8:30am registration for 9:00am
Venue: Southbank Convention Centre, Townsville

Expression of Interest & Registration

- *Do you work with people who have chronic disease management issues?*
- *Would you like to integrate delivery of your services with other providers?*

If so, then expressions of interest are invited from organisations to **set up a trade display at the Service Delivery Navigation Chronic Disease Management workshop.**

We have nominated to present the activity in a game-like format and the trade displays will be an integral part of our one day seminar.

Service Delivery Navigation will involve the development of service delivery solutions for chronic disease case studies. Each table will have a Navigator who will seek out answers by group discussion and visiting various chronic disease service provider workstations set up around the room.

For each five questions answered correctly, the table will get a compass point – four in total. The winning table, ie. the first to complete their compass, will receive a prize.

We are seeking service providers to set up stalls at the workshop and assist participants in seeking their answers. We would like to invite you to be one of our service providers. If you are interested in participating in this exciting day please fax your interest back.
