### REGISTRATION

**You are invited to attend a day of educational dynamism with Navigators to steer you through solving chronic disease puzzles contained in case studies.**

Service Delivery Navigation will involve the development of service delivery solutions for two chronic disease case studies. Each table will have a Navigator who will deliver the case studies and quiz you on the answers to questions provided. The Navigator will guide you to seek out answers by group discussion and by visiting various chronic disease service provider workstations set up around the room.

For each five questions answered correctly, the table will get a compass point – four in total. The winning table, ie. the first to complete their compass, will receive a prize.
